TODAY IN AI

- OpenAI expands AIdriven security collaborations and raises bug bounty payouts.
- 42AI launches a behaviorpredicting world model funded by a $62.5M seed round.
- Legal actions target AI data scraping and paywall bypass by browsers.

TOP STORIES

1. Preparing our next security sprint to harden OpenAI

OpenAI | Tools | importance 9/10 | 02 Nov

OpenAI announced a new security sprint partnering with Cathedral to use its models for testing defenses, quadrupling bug bounty rewards and committing $1 billion in subsidized AI access for frontline defenders.

2. Rewarding defenders with bigger bug bounties

OpenAI | Research | importance 9/10 | 02 Nov

OpenAI increased its bug bounty payouts, offering up to $30,000 for critical bugs and up to $172,000 with bonuses, adding quality multipliers and a tiered loyalty program for researchers.

3. 42AI comes out of stealth with $62.5M and a world model that can 'predict human behavior'

TechCrunch AI | Models | importance 8/10 | 02 Nov

Israeli startup 42AI emerged from stealth with $62.5 M seed funding, claiming its transformerbased world model can predict individual trader behavior by modeling psychological tendencies.

4. The New York Times sues Brave web browser for AI scraping and bypassing paywalls

The Verge AI | Policy | importance 7/10 | 02 Nov

The New York Times and three other publishers sued Brave for allegedly scraping copyrighted content to feed AI models and enabling users to bypass paywalls without permission.

5. The latest AI news we announced in October 2026

Google AI Blog | Tools | importance 7/10 | 02 Nov

Google recapped October 2026 releases, including Gemini 4 Argon and Carbon models, Genie 4 simulation tool, and new AI safety features like SynthID Detector.

6. Raising the quality of insights in agentic analytics

MIT Tech Review | Tools | importance 7/10 | 02 Nov

MIT Technology Review reported that only 48% of insights from enterprise analytics agents lead to business improvements, highlighting context gaps and overload as key challenges.
