

TODAY IN AI

- Enterprise AI adoption accelerates with workflow automation, talent development, and open models; firms focus on governance and cost efficiency.
- AI providers release tools for production scaling and faster scientific reporting, emphasizing transparency and reproducibility.
- The debate over open versus closed AI development intensifies as capabilities expand into highrisk domains.

TOP STORIES

1. Chatham scales its capital markets expertise with OpenAI

OpenAI | Models | importance 10/10 | 02 Oct

Chatham Financial uses Codex and GPT5.6 to automate trade validation, cutting processing time from 30 minutes to under 4, and embeds AI across clientfacing tools while maintaining auditability.

2. Anthropic invests \$100 million to train 10,000 engineers and tackle the enterprise AI talent gap

Anthropic | Business | importance 9/10 | 02 Oct

Anthropic launches Claude Frontier Academy, investing \$100 million to train 10,000 Frontier Deployed Engineers by 2027, aiming to close the enterprise AI talent gap.

3. A model guide for the GPT-6 family

OpenAI | Models | importance 8/10 | 02 Oct

OpenAI publishes a guide for GPT6 deployment, offering best practices for model selection, prompt design, caching, monitoring, and costeffective production workflows.

4. Open-sourcing AstaBrief, the fast report-generation model in Asta

Hugging Face | Models | importance 8/10 | 02 Oct

Hugging Face opensources AstaBrief 8B, a lightweight model for generating cited scientific reports, achieving ~3.5× faster generation than proprietary alternatives.

5. OpenAI's Dot agent is enterprise software that can also order your dinner

The Verge AI | Tools | importance 7/10 | 02 Oct

OpenAI introduces Dots, an enterprisefocused AI agent platform with avatar UI, capable of interacting with desktop apps and cloud tools, initially limited to Pro users.

6. These AI Experts Want to Do High-Stakes Research Out in the Open

Wired AI | Research | importance 7/10 | 02 Oct

Trillium Labs, founded by former AI researchers, proposes openscience approach to highrisk AI research, publishing experiments to enable broader scrutiny and risk mitigation.
