TODAY IN AI

- AI providers adopt a shared robots.txt signal for contenttraining preferences
- OpenAI releases a community safety report and tightens teen firearm content rules
- Google's spacebased AI satellite demonstrates TPU operation and generates its first output

TOP STORIES

1. Making it easier for websites to express AI training preferences

OpenAI | Tools | importance 9/10 | 30 Oct

OpenAI will honor a common signal in robots.txt that lets sites express AI training preferences to multiple providers, simplifying compliance and building on IETF standards.

2. Community safety report and new protections for teens

OpenAI | Policy | importance 9/10 | 30 Oct

OpenAI announces a Community Safety Report and adds stricter limits on firearmrelated queries for minors, aiming to improve violenceprevention safeguards.

3. Google's first data center satellite is online and writing poetry

TechCrunch AI | Models | importance 8/10 | 30 Oct

Google's Suncatcher satellite, equipped with four TPUs and the Gemma4 model, successfully generated a haiku in orbit, testing inference workloads under space conditions.

4. Intel's stock crashes, knocking $12B from government's stake

TechCrunch AI | Policy | importance 7/10 | 30 Oct

Intel's shares fell 28% after a weak Q4 outlook, wiping $12 billion from the U.S. government's stake and highlighting AIdriven PC market pressures.

5. The biggest names in AI are backing a new way to opt out of scraping

The Verge AI | Policy | importance 7/10 | 30 Oct

OpenAI, Google, Microsoft and Anthropic commit to a shared "policy token" in robots.txt, enabling publishers to opt out of AI scraping across multiple crawlers.

6. Google's satellite AI server transmits its first response to Earth

The Verge AI | Research | importance 7/10 | 30 Oct

Google confirmed its Suncatcher satellite's TPUs are operational, producing a spacethemed haiku and moving toward twinsatellite AI data centers in 2027.
