AI NEWS DIGEST

Thursday, 29 October 2026

70 articles scanned | 12 sources | top 6 stories summarised by AI

TODAY IN AI

- Google's Gemini 4 Carbon model emphasizes cybersecurity and longhorizon tasks, entering a staged rollout for trusted partners.
- Legal AI platform Legora leverages OpenAI agents to accelerate contract review and internal debugging, highlighting agentic workflow gains.
- Microsoft disclosed Azure revenue of $33.2 billion, confirming its lead over Google Cloud and underscoring cloudAI growth.

TOP STORIES

1. Gemini 4 Carbon: Our next frontier model

Google DeepMind | Models | importance 10/10 | 28 Oct

Google introduced Gemini 4 Carbon, a frontier model topping security benchmarks (SECbench Pro, ExploitGym) and offering improved coding, agentic, and scientific performance, with a phased release to cyber defenders via the Fairwind Program.

2. Legora is building the agentic operating system for legal work

OpenAI | Models | importance 10/10 | 28 Oct

Legora, powered by OpenAI models and coding agents, provides an agentic operating system for legal work, speeding contract review and internal issue resolution, and enabling rapid prototyping of solutions.

3. Microsoft just shared Azure's actual revenue in dollars: $33.2 billion

TechCrunch AI | Business | importance 9/10 | 28 Oct

Microsoft reported Azure generated $33.2 billion in Q3 revenue, a 48% YoY increase, surpassing Google Cloud and exceeding analyst expectations, highlighting Azure's central role in AI infrastructure.

4. Google launches Gemini 4 Carbon with a 'significant leap' in cybersecurity

The Verge AI | Models | importance 9/10 | 28 Oct

Google's Gemini 4 Carbon claims top rankings on AI benchmarks, especially in cybersecurity, and is initially available to select defense firms before broader partner rollout.

5. Google announces Gemini 4 Carbon, its latest frontier AI model that you can't use

Ars Technica AI | Models | importance 9/10 | 28 Oct

Ars Technica notes Gemini 4 Carbon as an incremental upgrade over Argon, with modest benchmark gains and a cautious, staged release due to safety considerations.

6. OpenAI and ServiceNow expand partnership across enterprise workflows

OpenAI | Business | importance 9/10 | 28 Oct

OpenAI and ServiceNow expanded their partnership, integrating OpenAI models and agents into ServiceNow workflows for development, IT, and security, adding ChatGPT Work and Codex capabilities for enterprise users.
