

TODAY IN AI

- EU text watermarking rolls out with optin API option, highlighting earlystage detection limits
- OpenAI tests visual ads in ChatGPT, linking to new measurement partners
- Specialized Arabic dialect model released, showing focus on regional language nuance

TOP STORIES

1. Our approach to EU text provenance rules

OpenAI | Policy | importance 9/10 | 05 Oct

OpenAI adds invisible text watermarking (textGrain) for EU ChatGPT and Codex outputs, optional for API users, citing detection limits and plans opensource release.

2. Building advertising for the way people use AI

OpenAI | Business | importance 9/10 | 05 Oct

OpenAI introduces a visual ad format in ChatGPT, testing in the US, with expanded measurement integrations and early partner performance data.

3. Falcon-Emirati: When an LLM Learns the Dialect, the Culture, and the Nuance

Hugging Face | Models | importance 8/10 | 06 Oct

Hugging Face releases FalconEmirati7B, a dialectspecific Arabic model built on FalconH1, targeting Emirati language nuances and cultural context.

4. Introducing GLM 5.3 on Amazon Bedrock

AWS ML Blog | Models | importance 8/10 | 05 Oct

AWS Bedrock now offers GLM 5.3, a 753B MoE model optimized for coding and longcontext agentic tasks, with prompt caching and API access.

5. OpenAI is adding text watermarking in ChatGPT and Codex

The Verge AI | Models | importance 8/10 | 05 Oct

The Verge reports OpenAI's EUonly textGrain rollout, noting it isn't a global default, optin API option, and limited detector access for researchers.

6. OpenAI PR tells journalist to 'move on' while asking Sam Altman about a ChatGPT user's suicide

The Verge AI | Models | importance 8/10 | 05 Oct

OpenAI publicist urged a Vanity Fair journalist to move on from a ChatGPTrelated suicide question, sparking criticism over handling of mentalhealth concerns.
