## TODAY IN AI

- OpenAI launches faster, cheaper GPT6.1 Terra with strong visual and computeruse abilities
- Fanatics leverages OpenAI models to boost ecommerce engagement
- Anthropic's IPO filing reveals massive compute spend and enterprise growth

## TOP STORIES

### 1. Introducing GPT-6.1 Terra

OpenAI | Models | importance 10/10 | 26 Oct

OpenAI unveiled GPT6.1 Terra, a visualreasoning, computeruse model that runs three times faster and at half the cost of its predecessor, cutting error rates and offering cheaper API pricing for highvolume tasks.

### 2. How Fanatics and OpenAI streamline the fan experience

OpenAI | Tools | importance 9/10 | 26 Oct

Fanatics introduced an OpenAIpowered "Shop the Look" feature that recommends coordinated merchandise, achieving a 10% engagement lift across 30,000 MLB products after a rapid development cycle.

### 3. OpenAI announces three big science discoveries and a new way to work with academics

The Verge AI | Research | importance 8/10 | 26 Oct

OpenAI released AIgenerated proofs claiming breakthroughs in math, computer science, and physics, and now uses external "shepherds" to guide verification, sparking debate over selective disclosure practices.

### 4. Five weird details from Anthropic's IPO filing

The Verge AI | Business | importance 7/10 | 26 Oct

Anthropic filed its S1, disclosing executive compensation, personal security costs, and risks including potential catastrophic AI harm and speculative sentience, while outlining billions in compute commitments.

### 5. Anthropic's IPO filing reveals its strategy for keeping enterprise customers hooked

TechCrunch AI | Business | importance 7/10 | 26 Oct

Anthropic's IPO filing shows over 11,900 enterprise customers spending $100k+, with crossproduct usage driving ~900% net revenue retention and a strategy to lock in spend via integrated apps.

### 6. Anthropic's IPO Prospectus Reveals What's Under the Hood

Wired AI | Business | importance 7/10 | 26 Oct

Anthropic's prospectus reveals revenue growth to $16 billion but a $80.7 billion net loss, highlighting computeintensive costs, competitive pressures, and extensive risk factors around AI misuse and regulation.
