AI NEWS DIGEST

Wednesday, 28 October 2026

70 articles scanned | 13 sources | top 6 stories summarised by AI

TODAY IN AI

- Enterprise AI adoption accelerates with largescale voice agents and cloud partnerships
- OpenAI's advanced models achieve benchmark leadership and generate highvolume token usage
- Strategic investments and new multimodal foundations reshape AI market dynamics

TOP STORIES

1. Genie 4: A new generation of world simulation

Google DeepMind | Models | importance 10/10 | 27 Oct

DeepMind unveiled Genie 4, a worldmodel simulation platform delivering unprecedented realtime realism for research and product development.

2. Retell uses OpenAI models to help power 100M monthly calls

OpenAI | Business | importance 9/10 | 27 Oct

Retell uses OpenAI's GPT6 Astra and Codex to power 80% of 100 M monthly calls, achieving 80%+ resolution and surpassing 1 trillion tokens.

3. OpenAI expands partnership with Oracle to bring its apps to ChatGPT

OpenAI | Business | importance 9/10 | 27 Oct

OpenAI expands its partnership with Oracle, integrating ChatGPT and OpenAI models into Oracle apps, AI Workspace, and security tools for enterprise workflows.

4. VCs will make billions on Anthropic's IPO, but Amazon is set to make much (much) more

TechCrunch AI | Business | importance 8/10 | 28 Oct

Anthropic's IPO will return billions to VCs, while Amazon stands to gain the most via $6.2 B convertible notes and $10 B preferred equity.

5. Build specialized multimodal models with LFM3

Hugging Face | Models | importance 8/10 | 27 Oct

Hugging Face released LFM3, a 2 Bparameter multimodal foundation model optimized for ondevice inference and longcontext agentic tasks.

6. Frontier AI labs say their models refuted the Exponential Time Hypothesis. What does that mean?

TechCrunch AI | Models | importance 8/10 | 27 Oct

OpenAI released proofs refuting the Exponential Time Hypothesis; the result sparked community debate and coordinated responses from leading computer scientists.
