TODAY IN AI

- OpenAI rolls out BioBasicsBench to gauge AI agents on wetlab tasks, highlighting practical scientific utility.
- OpenAI secures $11 billion, reaching a $1.25 trillion valuation amid IPO delays and competitive pressure from Anthropic.
- AWS expands AI infrastructure: SageMaker adds GPU partitioning and Bedrock AgentCore powers autonomous security operations.

TOP STORIES

1. Measuring how AI agents handle everyday wet-lab science

OpenAI | Research | importance 9/10 | 06 Nov

OpenAI released BioBasicsBench, a 100task benchmark assessing AI agents' ability to interpret raw experimental data and perform routine wetlab procedures, aiming to measure practical scientific competence.

2. OpenAI valued at $1.25 trillion, as rival Anthropic nears its IPO

The Verge AI | Business | importance 8/10 | 06 Nov

OpenAI's latest funding round values the company at $1.25 trillion after raising $11 billion; CEO Sam Altman emphasizes safety over an imminent IPO, while rival Anthropic moves toward its own public offering.

3. OpenAI reportedly raises an additional $11 billion at a $1.25 trillion valuation

TechCrunch AI | Business | importance 8/10 | 06 Nov

TechCrunch reports OpenAI's $11 billion raise in a funding round targeting a $1.25 trillion valuation, with the total round expected near $20 billion, reflecting a scaledback goal from earlier $30 billion ambitions.

4. Anthropic IPO buyers see valuation as low as $1.1T

Hacker News | Business | importance 8/10 | 06 Nov

Discussion on Hacker News notes that investors considering Anthropic's IPO are pricing the company as low as $1.1 trillion, below earlier expectations.

5. SageMaker Inference now supports Multi-Instance GPU to maximize GPU utilization for model endpoints

AWS ML Blog | Tools | importance 7/10 | 06 Nov

AWS SageMaker Inference now supports NVIDIA MultiInstance GPU partitioning, allowing multiple models to share a single GPU with isolated resources, improving utilization and reducing costs.

6. How Greenlight Financial built an autonomous SOC solution on Amazon Bedrock AgentCore

AWS ML Blog | Tools | importance 7/10 | 06 Nov

Greenlight Financial built Luna, an autonomous SOC using Amazon Bedrock AgentCore, handling 34 k monthly security alerts with a tiered multiagent system, achieving secondslevel triage.
