

## TODAY IN AI

- OpenAI unveiled new AI agents, workspace tools, and the costeffective GPT6.1 Sol model at DevDay.
- AMD announced an \$8.2 B acquisition of World Labs to boost its AI chip and robotics capabilities.
- The Trump administration issued an order rebranding AI as "Super Intelligence," signaling a political shift.

## TOP STORIES

### 1. DevDay 2026 Recap

OpenAI | Models | importance 10/10 | 29 Sep

OpenAI's DevDay introduced persistent AI agents, a shared ChatGPT surface for humanagent collaboration, and native experiences for its 1.2 B weekly users, aiming to expand an open AI ecosystem.

### 2. Introducing GPT-6.1 Sol

OpenAI | Models | importance 10/10 | 29 Sep

OpenAI launched GPT6.1 Sol, delivering nearAstra performance on coding, document work, and multistep workflows at roughly one-fifth the cost, with lower token pricing and improved factuality.

### 3. Trump orders US government to call AI 'Super Intelligence'

The Verge AI | Policy | importance 8/10 | 29 Sep

President Trump signed an executive order mandating U.S. agencies replace "artificial intelligence" with "Super Intelligence," a semantic change intended to reshape public perception and regulatory language.

### 4. AMD acquires World Labs AI startup, upping the ante against Nvidia

Ars Technica AI | Business | importance 8/10 | 29 Sep

AMD agreed to acquire World Labs for \$8.2 B, bringing worldmodel technology and research talent into its portfolio to compete with Nvidia in AI-driven robotics and simulation.

### 5. OpenAI takes on Microsoft with the launch of what feels a whole lot like ChatGPT's own office suite

TechCrunch AI | Models | importance 8/10 | 29 Sep

OpenAI announced "Space," "Pages," and upcoming "Slides," AI-enhanced collaborative office tools within ChatGPT, positioning itself directly against Microsoft's productivity suite.

### 6. OpenAI launches Dots, its Muse competitor

The Verge AI | Models | importance 8/10 | 29 Sep

OpenAI released "Dots," always-on AI assistants powered by GPT6 Astra, capable of interacting with 4,000+ apps, learning user preferences, and operating within ChatGPT's new collaborative workspace.
