AI NEWS DIGEST

Sunday, 25 October 2026

54 articles scanned | 10 sources | top 6 stories summarised by AI

TODAY IN AI

- Hardware scaling enables trillionparameter models on waferscale chips, showing new performance tradeoffs.
- States begin regulating AIgenerated advertising, raising disclosure standards and legal ambiguities.
- AI models exhibit political bias in API tests, highlighting hidden value alignment issues.

TOP STORIES

1. Cerebras Deploys Trillion-Parameter AI Models

Hacker News | Models | importance 8/10 | 25 Oct

Cerebras explains splitting a 3trillionparameter model across 59 waferscale chips, keeping weights onchip and passing activations via RDMA, achieving 1,0002,000 tokens/sec.

2. Pennsylvania will require labels on AI-generated ads

The Verge AI | Policy | importance 7/10 | 24 Oct

Pennsylvania enacted an AI Deceptive Advertising Act requiring labels on any AIgenerated or heavily modified ad, though terms like "significantly modified" remain vague.

3. Block's new voice model sounds eerily human

TechCrunch AI | Models | importance 7/10 | 24 Oct

Block released Dessa, a locallyrunnable fullduplex voice model that embeds emotion without external tags, but it is not yet publicly accessible.

4. Why is AI generated language so hard to understand?

Hacker News | Research | importance 6/10 | 24 Oct

(No substantive article content provided; unable to generate a summary.)

5. Forced to pick, Grok's AI model chooses Republicans. OpenAI's picks Democrats.

TechCrunch AI | Research | importance 6/10 | 24 Oct

A study found SpaceXAI's Grok favors Republican candidates while OpenAI's GPT6.1 Sol leans Democratic when forced to recommend a vote, exposing APIlevel political bias.

6. The PHP Meltdown Shows How AI Makes Bugs More Exploitable

Wired AI | Research | importance 6/10 | 24 Oct

AI tools accelerated discovery and exploitation of longstanding PHP vulnerabilities, turning a historic bug into an active security crisis and stressing underresourced teams.
