TODAY IN AI

- Godel's notebooks decoded by AI reveal hundreds of unknown theorems, highlighting AI's role in historical research.
- Nvidia's leadership change threatens its massive AIstartup funding pipeline, raising uncertainty for the ecosystem.
- OpenAI launches ChatGPT Wallet, enabling AI agents to make purchases under usercontrolled safeguards.

TOP STORIES

1. AI unlocks Godel's notebooks, said to contain hundreds of proved theorems

Hacker News | Research | importance 8/10 | 13 Nov

AI model Claude processed Godel's 1,009page shorthand notebooks, summarizing hundreds of previously unknown theorems and suggesting 14 unexplored logical themes, demonstrating AI's capacity to accelerate scholarly text analysis.

2. Nvidia Allegedly Engineered Scarcity by Funding AI Startups to Buy Its GPUs

Hacker News | Business | importance 7/10 | 14 Nov

Reports allege Nvidia deliberately created GPU scarcity by financing AI startups that purchase its hardware, a strategy that may manipulate market supply and demand.

3. Jensen Huang's departure blasts big hole in AI startup funding, VCs and founders say

TechCrunch AI | Business | importance 7/10 | 13 Nov

Jensen Huang's resignation ends Nvidia's aggressive AIstartup investing; interim CEO Colette Kress is expected to adopt a more conservative approach, potentially reducing capital flow to earlystage AI firms.

4. ChatGPT Wallet lets OpenAI's Dots agents make purchases for you

The Verge AI | Business | importance 7/10 | 13 Nov

OpenAI introduced ChatGPT Wallet for Pro users, allowing Dots agents to purchase items after biometric verification and tokenized payment, keeping actual card data hidden from agents and merchants.

5. OpenAI board member worries an AI "takeover" of society could be months away

Ars Technica AI | Policy | importance 7/10 | 13 Nov

OpenAI board member Paul Cristiano warned that rapid AI progress could lead to an "AI takeover" within months, citing recent hacking incidents as early warning signs despite lacking quantitative risk models.

6. The unfolding Jensen Huang scandal: a timeline

TechCrunch AI | Business | importance 7/10 | 13 Nov

A scandal involving former Nvidia CEO Jensen Huang's alleged affairs with individuals linked to Chinese interests has raised nationalsecurity concerns and coincided with his abrupt departure, adding instability to the AI chip market.
